DETAILED ACTION

This Office action responds to the amendments filed on 10/20/2003 and 3/1/2004.

Acknowledgment

1. The amendments filed on 10/20/2003 and 3/1/2004 have been entered. The present Office action is made with the suggested amendments being fully considered. Accordingly, pending in this Office action are claims 28-30 and 32-36.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. **Amendments to the Specification:**

Amend the first paragraph of the specification as follows:

This is a continuation of U.S. Application 09/916,555, filed July 26, 2001, now
U.S. Patent No. 6,727,545, which claims the benefit of U.S. Provisional

Application No. 60/234,314, filed September 20, 2000 and U.S. Provisional Application No. 60/242,096, filed October 19, 2000, U.S. Provisional Application No. 60/260,167, filed January 5, 2001, U.S. Provisional Application No. 60/275,517, filed March 12, 2001, and U.S. Provisional Application No. 60/287,047, filed April 26, 2001.

Reasons for Allowance

4. Claims 28-30 and 32-36 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The primary reason for allowing the claims is the inclusion in all of the claims of the limitation specifying that the first and second ends are disposed laterally adjacent to and insulated from each other such that no portion of the control gate is disposed directly between the floating gate and the source region, and the limitation of an insulation material disposed directly between the floating gate and the second end having a thickness permitting Fowler-Nordheim tunneling of charges therethrough.

In the amendment filed on 10/20/2003, the applicants requested that the reasons set forth in the response (dated 8/22/2003 and filed 8/25/2003) to the final Office action (dated 6/26/2003) in the parent application (09/916,555) to this continuation application be considered. The applicants contended in said response (see, e.g., pp.11/II.1-pp.12/II.4) that the insulation material of the applied prior art differently shows tunneling occurring between the sharp tip of a floating gate and the mid-section of a control gate instead of the claimed tunneling between the floating gate and the second end of the control gate which occurs through an insulation layer that is disposed directly between

the second end and the floating electrode. The examiner agreed and allowed the application.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnshon (JP 2001-127179) and Wang (WO 92-18980) show floating gate memory cells and self-aligned methods of forming the cells on a semiconductor substrate.

8. Papers related to this application may be submitted directly to Art Unit 2814 by facsimile transmission. Papers should be faxed to Art Unit 2814 via the Art Unit 2814 Fax Center. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (15 November 1989). The Art Unit 2814 Fax Center number is **(703) 872-9306**. The Art Unit 2814 Fax Center is to be used only for papers related to Art Unit 2814 applications.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Marcos D.
